A PROVISIONAL BIBLIOGRAPHY OF THE NATURALISTS AND NATURAL HISTORY OF CUMBRIA.

COMPILED BY ALLEN F. ARMSBY.

INTRODUCTION

I am undertaking this bibliography on a voluntary basis as a member of the Carlisle Natural History Society and a retired librarian. The Project is intended as a tribute to the many scientists, researchers and naturalists who, through their writings, have contributed to the appreciation and record of Cumbria's outstanding variety of wildlife, natural history, ecology and its underpinning scientific research. In acknowledgement of the Museum and the Societies interests in biological recording many of the entries contain species lists for additional information. I hope it will prove to be a useful reference source for the members of the Society and for the staff of the museum and researchers. I can be contacted either through the Department of Natural Sciences, Tullie House, Carlisle or by e-mail at mail@armsby90.freeserve.co.uk and would appreciate receiving new additions submitted by authors and researchers.

Some useful bibliographies are listed in the text under the entry-**Bibliographies**. Whilst Cumbria is the main focus, this bibliography features many nationally recognised authors and some **non Cumbrian references** have been included to reflect the breadth of those authors interests. Entries have been made for each individual featured in joint author entries which does result in some duplication but should help researchers to print out full entries for each author without having to search the whole bibliography. I do not claim to have created definitive bibliographies for every individual whose works are recorded, neither have I recorded every publication of the FBA which has its own excellent web-site.

The next edition of this bibliography is scheduled for January 2016. This is a work in progress, there are bound to be errors for which I offer my sincere apologies, if you find them please let me know. All mistakes are mine and are not irreversible.

Searches should be used to find individual species, locations etc. Most entries have been allocated one or more broad subject headings allowing searches to be undertaken with greater speed. The subject headings are as follows : **Amphibians**. **Bibliographies**. **Biography**. **Birds**. **Climate**. **Coast & Estuaries**. **Conifers**. **Crustacean**. **Ecology**. **Ferns**. **Fish**. **Flora**. **Forests**. **Fossils**. **Fungi**. **Geology**. **Insects**. **Lakes & Tarns**. **Lichens**. **Mammals**. **Marine**. **Marine Mammals**. **Marsh & Mires**. **Molluscs**. **Moorland & Upland**. **Moss**. **Mountains**. **Nature Reserves**. **Obituary**. **Pollution**. **Ponds**. **Raptors. Reptiles**. **Rivers and Streams**. **Spiders**. **Trees**. **Woodland**.

I should like to acknowledge the patience and constant support of Stephen Hewitt, Keeper of the Department of Natural Sciences at Tullie House. My thanks must also go to members of the Society, Jeremy Roberts, Geoff Naylor, John R.W.Read, Geoff Horne, Steve Doyle, and Frank Mawby. I am grateful to Dr Francis Celoria for allowing me to draw extensively from his unpublished bibliography of the Rev.H.A.MacPherson. Thanks also to both Dave Shackleton and Robin Sellers for generously allowing me unrestricted access to their bibliographies of Cumbrian Birds. I am grateful to Ian Winfield for his practical assistance and to Stephen White and his staff in the reference section of Carlisle Central Library. Also the library staff at Newton Rigg Campus Library and Hardy Schwemm, Librarian of Freshwater Biological Association. Finally thanks to Peter Bullard for allowing me to explore the archives of the Cumbria Wildlife Trust.

Finally, I wish to record my sincere thanks for her encouragement, patience and vital technical support of my wife, Jill.
